---

Jean,

Attached is a copy of the graph that Tim Kresse referenced during the meeting/ conference call on April 12, 2011. I would like to caveat that the linear regression graph is only a rough representation. Mr. Kresse's position is as advisor to EPA through a USGS contract. He has only started his review of the data. A more formalized evaluation of the data will be provided to EPA at a later date. If you have any difficulties with the attachment, please let me know.

Dianna
